Reporting Services

V Group understands to truly take advantage of the data you have, you need to be able to extract the information you need in a precise, relevant way. A well designed report provides you with the correct data in the exact format you need and enables your team to make more informed business decisions. Whether you're looking for a complete solution, expert guidance for your team as they implement a system or a review of an existing system, V Group is the choice for you.

SQL Server Reporting Services (SSRS)

V Group's SSRS consulting services help empower your users to make informed decisions based on trusted data and delivered in ways relevant for the user. We will work with you to develop a strategy, create visual representations of processes and performance, deploy dashboards, and create flexible, informative management and operational reports.

- Design reports in both tabular and list formats
- Create expressions
- Select and use collections
- Integegrate and optimize use of stored procedures
- Correctly use SSRS security
- Understand and ensure correct use of SSL and data source security
- Build web services
- Create service subscriptions
- Create custom assemblies for use in SSRS
- Migrate and upgrade

Crystal Report Services

Work with our senior Crystal Report experts to plan, test, and deploy your reports to maximize your data. Our reporting specialists will help you develop secure, web-based solutions for report viewing that will provide your users with the ability to view, run, and schedule reports.

- On-Site Report Development
- Reports Publishing
- Crystal support services
- Crystal consulting
- Remote Report Development
- Crystal Deployment
- Audit and optimize existing reports
- Crystal Reports Training

Features & Benefits

We offer reporting services at a very cost effective rate. Our on-site points of contact allow for face-to-face contact and ensure there is always someone ready to answer your questions. At the same time, they also coordinate with the offshore service teams to ensure that all requirements precisely meet and exceed your expectations.

- Predictable / repeatable process execution resulting in efficient time management.
- Sustainable reduction in cost of ownership.
- Scalable infrastructure and resource pool.
- Leveraging V Group's skills and expertise in domain knowledge as well as technology.

Why V Group?

We have over a decade of experience as an Information Technology Services Company providing the highest caliber reporting services and professional consultants. Our team is constantly training on the new technologies to on top of the industry. We are ready to manage your reporting needs.

- Onsite – offshore model allowing face-to-face interaction throughout all aspects of maintenance while drastically cutting your overall cost of production
- Long-standing partnerships and alliances with the biggest players in IT; including Amazon, Apple, Microsoft, and Oracle
- Experience working with clients like J.Crew, Ann Inc., American Express, Boeing, Apple, Sears, Best Buy, Michael Kors, Honeywell, and MTV

Experienced SMEs

Our reporting services team is full of Subject Matter Experts that were handpicked from the best institutions and companies in the world. We tackle all of our contracts with the utmost focus and diligence, and we realize that having a talented and experienced team is necessary to do this. Our team is proficient in numerous technologies, including:

- MS SQL Server2012/2008 R2/2008/2005/2000/7.0
- MS SQL Profiler
- SQL Query Analyzer
- ERWIN 4.1.2/4.x/3.x

- Oracle 8i/9i/10g/11g
- SSRS 2005/08/ 08 R2
- Crystal Reports2008/XI/10/9/8.5
- MS SQL Server Integration Service (SSIS)
- Business Objects 4.0/XI R3/R2/6.X/5.X

Competitive Costs

V Group is able to offer premium reporting services at highly competitive rates thanks to our global IT network. Also, if offshore development is not the right solution for your needs we also work with some of the best domestic reporting experts in the industry.

Domestic Point of Contact

Here at V Group we understand how difficult it can be to work with an outside team, especially if they are not working on-site. This is why our lead reporting experts are based in the United States and once assigned to a project will available every day for phone and video calls, and even site visits upon request.
